<b>Primary Routes of Exposure</b>	Inhalation, skin, eye	Dermal
<b>Potential Health Effects</b>	<p><b>Acute (short term):</b> This product if inhaled may cause nose, throat, and mucous membrane irritation and possible central nervous system effects including headaches, nausea, vomiting, dizziness, drowsiness, loss of coordination, impaired judgment, and general weakness. It may cause moderate irritation to the skin with dryness, cracking, and possible dermatitis with prolonged or repeated contact. Direct eye contact with this product may cause immediate irritation to the eyes with redness, burning, tearing and blurred vision. It may cause mouth, throat and gastrointestinal irritation, nausea, vomiting, and diarrhea if ingested. Aspiration of material into the lungs can cause chemical pneumonitis, which can be fatal.</p> <p><b>Chronic (long term):</b> Prolonged or repeated skin contact may result in irritation, dermatitis marked by rough, dry cracking skin. Contact with the epoxy resin may cause sensitization.</p>	<p><b>Overexposure effects:</b> Direct or prolonged skin or eye contact can cause skin and eye burns. Swallowing liquid can burn mouth and cause nausea, vomiting, diarrhea, abdominal pain and collapse. Can cause allergic skin and respiratory reactions after repetitive exposure. Animal studies on component (s) have shown effects on liver and fetus.</p>
<b>Medical Conditions Aggravated by Exposure</b>	Persons with a history of chronic respiratory disease, skin disease, or central nervous system disorders may be at increase risk for worsening their conditions from exposure to this product.	Persons with a history of allergic conditions may be at increased risk for worsening their conditions from exposure to this product.

### Personal Protection

Description	CeRam-Kote 99P(catalyzed) and/or PART-A: CeRam-Kote 99P (Base)	PART-B: CeRam-Kote 99P (Curing Agent)
<b>Engineering controls</b>	General dilution ventilation and/or exhaust ventilation should be provided as necessary to maintain exposures below regulatory limits.	Good general mechanical ventilation is recommended. Local exhaust recommended.
<b>Respiratory Protection</b>	If irritation occurs, or if the TLV or PEL is exceeded, use a NIOSH/MSHA approved air purifying respirator with organic vapor cartridges or canisters, or supplied air respirators. Use respiratory protection in accordance with your company's respiratory program, local regulations or OSHA regulations under 29 CFR 1910.134.	Organic chemical cartridge respirator, if needed.
<b>Dermal Protection</b>	Loose fitting long sleeved shirt, long pants and chemical resistant gloves such as neoprene or natural rubber gloves.	Wear impervious rubber gloves
<b>Eye Protection</b>	Chemical protective goggles.	Splash-proof chemical goggles

## Section 9. Spills, Leaks and Disposal

Description	CeRam-Kote 99P(catalyzed) and/or PART-A: CeRam-Kote 99P (Base)	PART-B: CeRam-Kote 99P (Curing Agent)
<b>Land Spill</b>	Prevent material from entering sewers or waterways. Remove all sources of ignition (flames, hot surfaces, and electrical static or frictional sparks). Ventilate area. Absorb with inert materials (vermiculite or sand) and place in a closed container for disposal as solid waste. Wash area well with trisodium phosphate and water.	Avoid all personal contact. Take up with absorbent material. Shovel into closeable containers. Flush contaminated area with water.
<b>Water Spill</b>	Material is mostly insoluble. The material will sink. Notify local environmental, health and wildlife authorities, and water intake operators. Contain with booms and minimize spread on water. Disperse any remaining residue to reduce aquatic harm.	This product is miscible in water. That means it is totally dissolved when mixed with water. Due to this property, this is considered a marine pollutant; however, when mixed with part A, and after the product cures, it is totally inert.
<b>Air Release</b>	Spills of this material may release volatile organic compounds into the air. Spills should be cleaned or covered to prevent volatilization	This product reacts with air by absorbing the moisture out of the air. Take up with absorbent material. Shovel into closeable containers. Flush contaminated area with water.
<b>Disposal Considerations</b>	Characteristic hazardous waste (D001) due to ignitability	Not a hazardous waste under RCRA (40 CFR 261).
